4:00 - ?	One on one time for plot tours

SPEAKERS

Dr. Dan Skow D.V.M. a practicing veterinarian and partner of Fairmont Veterinary Clinic in Fairmont, Minnesota. Dan is also the founder and partner of International Ag Labs Inc., a lab devoted to carrying on the legacy of Dr. Reams' approach to soil fertility and crop growth. Dr. Dan is a long-time trainer in teaching Dr. Reams' methods.

Dr. Michael McNeill was born and raised in Algona, Iowa. He received his B.S. degree in Agronomy from Iowa State University, later he received his M.S. degree in Plant Physiology and Ph.D. in Statistical Genetics. Prior to developing a company called Ag Advisory, Ltd., Mike worked as a Research Scientist and Research Director. Ag Advisory, Ltd. is an agricultural consulting company working with clients from Texas to Saskatchewan, Canada

Bob Streit born and raised on a farm in Mitchell Co. Iowa. He graduated from ISU with a degree in Plant Pathology and Pest Management. Bob worked four years with Servi-Tech Inc., the nation's largest crop consulting company. He moved back to Iowa and organized the agronomy services with a large Co-op in Central Iowa. He spent 19 years with Dekalb and Cargill/Mycogen Seed Companies as a tech service agronomist. He then began working for farming clients as a consulting agronomist in Iowa. Until 2000, Bob helped work and manage the home farm. Recently he has been traveling to South America to study soybean rust and works with their pathologists on control methods. This has led him to work with the U.S. Rust Task Force and other projects with the USDA.

Keith Schlapkohl, one of the owners of B.R.T. has farmed his entire life with a short break to attend college. A visionary all his life, Keith has farmed many years without conventional phosphorus or potassium use with soil levels being maintained through the aid of waste streams and very unique equipment. His yields have steadily increased while using low nitrogen levels.

Jeff Litrell Vice President of B.R.T. has studied with Dr. Skow for 15 years working and formulating liquid and dry fertilizers, building soil programs, and using the Morgan soil test. Jeff has studied at the University of MN Waseca/Rochester, IA State, and Purdue University. He has designed programs for agricultural crops and turf. Additionally, he continues to work closely with the family farm, which has been organic for 14 years.

Dr. Arden Anderson is a family physician and agricultural consultant whose work focuses on the link between human health/preventative medicine and soil/crop nutrition. He travels around the world teaching farmers how to apply basic nutritional principles to improve soil health and productivity, crop production and nutritional density while at the same time improving the health and wellbeing of the farmer and his family. Dr. Andersen has an Ag degree from the University of Arizona, taught high school vocational agriculture in Michigan before going into private consulting. He worked as a research assistant for Dr. Dan Skow, an agronomist and products development engineer for AgriEnergy Resources. has consulted and taught twice yearly in Australia since 1998. He has written 4 books including *The Anatomy of Life and Energy in Agriculture*, *Science In Agriculture* and *Real Medicine, Real Health*. He is an accomplished public speaker and has penned many short articles on biological agriculture and health.

Does your corn have antenna?

Can your soybeans flower like this?
