

# Midwest Corn Yield Summary

## YIELD RESULTS

Average yield increase of 14 bu/A vs. no sulfur.

### Overview

Trials were conducted across six Midwestern states to evaluate the effects of SO4 pelletized gypsum on corn yield as a sulfur source vs no sulfur.

### Background

- A compilation of 123 trials in 45 counties, from university, third-party and dealer collaborators.
- Silt- and clay-loam soils
- Average application rate of 152 lbs/A (26 units sulfur/A)
- All applications were pre-plant applications
