

# Wisconsin Corn Yield Summary

## YIELD RESULTS

Average yield increase of 14 bu/A vs. no sulfur.

### Overview

Trials were conducted in Wisconsin to evaluate the effects of SO4 pelletized gypsum on corn yield as a sulfur source vs no sulfur.

### Background

- Compilation of 4 replicated trials in two counties from third-party and dealer collaborators
- 2018-2023 crop years
- Silt loam soils
- Average application rate of 123 lbs/A (21 units sulfur/A)
- All applications were pre-plant applications
